UPPER COOK INLET COMMERCIAL FISHING ANNOUNCEMENT No. 1
EMERGENCY ORDER NUMBER 2S-01-13

Upper Cook Inlet Commercial Fishing Announcement No. 1 closes commercial salmon fishing in the Northern District of Upper Cook Inlet on Monday, May 27, 2013.

This announcement also reduces the open fishing time from twelve hours to six hours per day for the remaining four commercial king salmon fishing periods scheduled in the Northern District of Upper Cook Inlet for the 2013 season. The fishing periods affected by this announcement occur on the following four Mondays: June 3, June 10, June 17, and June 24, 2013. On these days, commercial fishing with set gillnets will be open in all waters of the Northern District of Upper Cook Inlet from 7:00 a.m. until 1:00 p.m. only; except commercial salmon fishing remains closed for the entire 2013 directed king salmon fishery in that portion of the General Subdistrict of the Northern District from a point at the wood chip dock located approximately three miles south of Tyonek at 61° 02.77' N. lat., 151° 10.04' W. long., to the Susitna River (Figure 1). All areas will return to their normal fishing schedule of 7:00 a.m. to 7:00 p.m. on Mondays and Thursdays, beginning on Thursday, June 27, 2013.

At the 2011 Upper Cook Inlet Alaska Board of Fisheries meeting, king salmon originating from the Chuitna River drainage were found to be a stock of management concern. As a result of this finding, the king salmon sport fishery in this drainage was closed, beginning with the 2011 season. The *Northern District King Salmon Management Plan* (5 AAC 21.366) specifies that if the Chuitna River is closed to sport fishing, the commissioner shall close the commercial king salmon fishery, by emergency order, from the wood chip dock to the Susitna River. This emergency order implements that mandatory closure. Escapement monitoring of king salmon stocks throughout the Northern District in 2012 revealed a pattern of continued low abundance and failure to achieve many minimum escapement objectives. With a below-average outlook for the upcoming season, and uncertainty over how quickly king salmon abundance may rebound, both sport and

commercial fisheries in the Northern Cook Inlet area will be managed conservatively during the 2013 season. The closure of the May 27 commercial fishing period and the reduction in fishing time for the remaining four fishing periods is intended to provide additional escapement of king salmon in streams throughout the Northern District.
